

Salami Khalil

Frontend Engineer

Abuja, Nigeria | sirlami.dev@gmail.com | sirlami.com
github.com/dev-salami | linkedin.com/in/khalil-salami

Frontend engineer building web and mobile products, with experience in blockchain-connected payments, USDC and wallet integrations. Co-founder of UniWrite and Unimart, working across frontend interfaces, backend APIs and product delivery.

Work Experience

Frontend Engineer - Zagnu

November 2025 - Present | Remote

- Build the React PWA for a Virtual ATM product connecting everyday payments with USDC and blockchain infrastructure.
- Develop web screens, routing and offline-ready behaviour, plus Android screens and navigation in React Native.
- Build Telegram bot flows, message logic and backend API integrations.

Frontend Developer - Sentimex

October 2024 - October 2025 | Remote

- Built responsive layouts and reusable components with Next.js, Tailwind CSS and Material UI.
- Delivered optimised, pre-rendered pages and interactive blockchain data visualisations using TypeScript.
- Collaborated on a Telegram bot for real-time project notifications.

Frontend Developer - Centiiv Technologies

November 2023 - August 2025 | Remote

- Translated Figma designs into responsive React and Next.js interfaces for a blockchain platform.
- Integrated multiple blockchain wallet providers; tested and debugged application flows while collaborating through Git.

Projects

Brightform - Ongoing project within Zagnu

- Work on merchant payments connecting Cash App and Venmo checkout with blockchain-based USDC settlement.
- The product settled 1,500+ transactions and processed over \$120,000 USD in payment volume in its first three months after launch.

UniWrite - Co-founder | January 2026 - Present

- Built an academic writing product end-to-end with Next.js and Python FastAPI, including AI-assisted, APA-cited chapters and Word export.

Unimart - Co-founder | October 2025 - Present

- Built marketplace screens, Go API endpoints and the admin dashboard. The platform onboarded over 100 users in its first month and supports 30+ student brands.

Technical Skills

Frontend: React, Next.js, TypeScript, JavaScript, Tailwind CSS, Material UI, Zustand, SWR

Mobile and backend: React Native, Go, Python, FastAPI, REST API integration

Blockchain and tools: Wallet integrations, USDC payment workflows, Solidity, Git, Figma implementation, responsive interfaces, testing and debugging
